Florence and Reyport advanced & per cent; New York Central sah stock was on the market to-day, and prices imed a fraction. The repudiation of contracts by some te heaviest purchasers for a rise, has not as yet had n unfavorable effect upon the market value of this seck. Only the parties immediately interested in these miracts are the sufferers. It may be very convenient wipe out a large amount of indebtedness by repudianation most of the time operations made in Wall street have to rest upon. It is not the custom for specushe have had too much confidence, to make the best of bad bargain. The Eric Railroad has been the grave of great many fortunes, but those who have from the rt had good pickings from the numerous financial semes which have from time to time been concooled management of the Eric Company, should not. treet and their contracts to take care of themselves differences from others, but when it comes to pay-

them, it is a different matter altogether. Most themselves off, holding fast to what they hove got. In other words, so long as it is for their interest to act honhey do not, they must give Wall street a wide berth. The receipts at the office of the Assistant Treasurer at this port to-day, were \$133,631; payments, \$210,568 48 balance, \$9,083,861 18.

For the extension to Harlem, more cars, horses, and depets, will, of course, be required. With the exception of about \$110,000, the stock is all held by the grantees of the road. This \$110,000 the grantees are willing to take in, and give in exchange bonus of the company, payable in five years, with seven per cent interest, and morigage the whole property as security. As reapests extravagance, it cannot be urged against this company with any trath, for the strictest economy has been observed in regard to the expenditures. As fast as money has been required it has been furnished by the grantees. Since the road was commenced there has not be an more than one hundred shares in all offered for sale in the market. Although the road even yet is not fully in operation, a dividend of four per cent has been earned and paid, leaving a very handsome surplus of earnings on hand.

If the Third and Sixth Avenue Railroad companies can

hand.

If the Third and Sixth Avenue Railroad companies can furnish us a statement as full and comprehensive as this, we will publish it with pleasure. We want figures and facts. In our remarks yesterday we excepted the Second Avenue Railroad, knowing it had been comparatively well managed in its finances.

The Boston Journal ways in relation to the comparatively well managed in the statement of the comparative of the comparat

managed in its finances.

The Boston Journal says in relation to the Vermont Gentral Railroat:—The latest reports are that Mr. J. N. Perkins, of New York, has been appointed tregsurer, and that he has accepted the office; that the treasury office is to be removed to New York, and that a transfer agency only will remain here. Also, that payment of the July interest on the second mortgage bonds will be postponed until September 1, when the company hope to be able to bring up its arrears. These statements are not from official sources, but we have reason to believe them correct. The new incumbent of the freesurership is said to be a gentleman of high character, wealth and influence, and if he can so manage as to straighten out the affairs of the Vermont Central Railroad, and inspire some confidence in the concern, we can only say that he will deserve to be called a public benefactor.

The warrants entered at the Treasury Department,

week ending \$258,892 55. The earnings of the Taunton Branch Railroad Company for the year ending May 31, 1854, amounted to \$168,95° 31; expenses, \$150,478 79—net profits, \$18,474 52.
